4. Troubleshooting 16

5. G	VIF (LVDS IN/OUT)	cable problem	17	7
------	-------------------	---------------	----	---

1.1 Main Specification

- 1. Input Spec. (MULTI VIDEO INTERFACE)
 - 3 x A/V Input (for external video source TV, DVB-T, DVD; Auto detection NOT supported) Support only NTSC for Toyota, Lexus, Cadillac Support only PAL for Land Rover, Range Rover, Jaguar
 - 1 x REAR-C Input (for external rear camera source; Auto detection NOT supported) Supports only NTSC for Toyota, Lexus, Cadillac Supports only PAL for Land Rover, Range Rover, Jaguar
 - 1 x Analog RGBCs Input (for navigation system)
 - 1 x GVIF Input (LVDS input)

2. Output Spec.

- 1 x GVIF Output (LVDS output)

- 3 x Audio Select (12V power comes out from 3 wires by AV1, RGB & REAR modes – MAXIMUM power available for each channel is 500 mA!!!)

3. Power Spec.

- Input Power : 8VDC ~ 18VDC
- Consumption Power : 6WATT, Max

4. Switch Input mode

- Input Video DISABLE Function : Possible to make each input disable by operating Dip S/W.
- Possible to switch Input mode with Keypad
- Possible to switch Input mode with switch for source toggle
- Possible to switch mode through CAN (ONLY for Range / Land Rover cars with OEM buttons MAP or NAVI)

1.2 Features

- -Improved High-definition
- -Support NTSC for Japan cars
- -Support PAL for European cars
- -Remote controller offered
- -Possible to move the displayed position of AV, Navigation.
- -Able to run OSD menu without image displayed.

3.1 Installation diagram

www.car-solutions.com

3.2 Cautions on installation

- Ignition key should be taken off before starting installation, interface power connection must be the last step in installation.
- Power cable should be separated when connecting interface.
- Should be no any electronic devices or magnetic pole around installation place.
- All steps of installation should be done by well-trained specialist.
- Dismantling without manufacturer's permission can not be guaranteed, (No permission to break attached label on the board.)
- Kindly check all parts are in the box, when receiving the product, if anything missing, inform to the supplier or manufacturer.
- According to our sales policy, any problems caused by user's mistake, careless can not be guaranteed.

3.3 Connecting CAN wires

* Connect the Brown+Green wire of CAN cable offered to Orange wire of the car, the Green wire of CAN cable offered to Green wire of the car like the above picture. **Only for Land/Range Rover cars!!!**

4. Troubleshooting

Q. I can not switch A/V sources.

A. Check IR or Ground cable connection. Check LED lamps in the interface, if it is not on, check power cable.

Q. All I got on the screen is black.

A. Check second LED lamp of the interface is on, if not, check A/V sources connected are working well. (Second lamp indicates AV sources connected works well.) Check interface connection has been done well.

Q. Displayed image color is not proper.

A. Try to select "INITIAL" in OSD menu if it does not work, inform the manufacturer.

Q. Rear camera image does NOT appear.

A. Set DIP switch #7 in "ON"

Q. Unwanted A/V mode is displayed. (A/V source switching order : OEM->RGB->AV1->AV2->AV3)

A. Check DIP Switch Setting.

Q. OEM image is not displayed.

A. Check interface's LVDS In/Out cable connection. Swap RED and WITE wires in LVDS IN/OUT cable If the status keeps on, inform the manufacturer.

Q. Screen only displays white like left picture.

A. Check LCD out cable is connected well, if this status keeps, inform the manufacturer.

5. GVIF (LVDS IN/OUT) cable problem

PROBLEM: GVIF output doesn't work

SOLUTION: Swap the YELLOW and RED wires in LVDS IN/OUT cable
